International Science Communication Manager (m/w/d)

Locations: Berlin or St. Ingbert

The European Research & Project Office GmbH—EURICE plans, advises and realises a wide range of research and innovation projects on an international level. As part of our multi-layered innovation ecosystem, we work with around 1,000 partners from universities, research institutions, and companies worldwide. The EURICE project portfolio, in the areas of health, quantum technologies and climate protection, for example, covers a broad spectrum of thematic focal points and research initiatives of varying technology/market maturity. This makes us one of the top consultancy and project agencies in Europe.

Become a member of our communications team and make an important contribution to driving new solutions for socially relevant problems forward and helping launch innovative business ideas.

Your tasks:

- Planning, coordinating, and implementing communication and marketing measures for multiple R&I projects and thematic project portfolios
- Preparing and adapting research and innovation topics for the broader public
- Creating and revising text material/content, primarily in English (e.g., web content, print material, audio-visual material)
- Supporting the development of corporate identity and corporate design concepts for European/international initiatives and projects
- Communicating with relevant target groups (including strategic stakeholder management, social media management, and supporting press and media work)
- Liaising with associations and interest groups
- Developing and implementing EURICE corporate communications measures

Your profile:

- Very good command of German and English, including excellent text comprehension, a good 'feel' for languages, and convincing presentation skills
- An academic degree, ideally in communications or language studies
- Professional experience in public relations/marketing or science communication, ideally in an agency or association, is desirable
- Work experience in the context of international projects is a bonus

Your personality:

- Communication all-rounder with a sound general education level and an interest in scientific, technological and economic topics
- Strong communication and conceptual skills
- Customer- and goal-oriented thinking, as well as an engaging and professional manner when communicating with external partners; good negotiation skills
- Ability to grasp complex issues quickly and to work independently, in a structured manner and attentive to detail
- Self-motivated team player
- Keen to travel

Your professional experience:

Our various communication projects offer challenging tasks where professional experience is a plus. However, they are also attractive opportunities for graduates.

What we offer:

- An open, friendly and inspiring working environment in the field of research & innovation as part of a committed team
- Attractive benefits such as a company pension scheme and supplementary health insurance
- Flexible working hours, part-time work, and the option to work from home
- Training opportunities and team events

Your application:

Have we caught your interest? We are looking forward to hearing from you! For us to consider your application, we ask you to submit the following in a single PDF file: curriculum vitae, references, and further diplomas or certificates. Please also state your preferred work location.

Send your application by e-mail before **30 April 2025** at: bewerbung@eurice.eu
