Research and Impact Manager (m/f/d)

Location: Sankt Ingbert or Berlin

The European Research & Project Office GmbH – **EURICE** plans, advises on and implements a wide range of research and innovation projects at international level. As part of our diverse innovation ecosystem, we work with around 1,000 partners from universities, research institutions and companies worldwide.

EURICE's project portfolio spans a broad range of thematic areas and research initiatives at different stages of technology and market maturity. At the heart of our work is the successful connection of leading European researchers with industry, SMEs and start-up communities.

Join our team and make an important contribution to advancing new solutions to societal challenges and helping innovative business ideas take shape.

Your Responsibilities

- **Network Management:** Contribute independently to the continued development and expansion of our diverse innovation ecosystems.
- **Project Management:** Proactively support the initiation, planning and implementation of international research and innovation projects.

This encompasses a wide range of strategic, advisory, operational, organisational and communication activities – **from the initial exchange of ideas through to successful project completion:**

- Coordinate network activities with relevant stakeholders
- Contribute to the initiation of collaborative projects and the development of funding concepts and proposals
- Advise and support project consortia in defining tasks, roles and responsibilities
- Manage internal project communication with project partners and liaise with funding organisations; plan and organise project meetings
- Prepare and communicate project results for specific target audiences; coordinate and organise exchanges with relevant stakeholders
- Develop marketing and information materials and write news articles and other project-related content
- Develop tailored sustainability and exploitation strategies

Your Qualifications

- Excellent written and spoken German and English
- A Master's degree or equivalent university qualification – ideally in a relevant field; a PhD is an advantage
- Knowledge of and experience in project management, ideally in the context of research or innovation projects
- An interest in and understanding of forward-looking topics in research and development
- Strong analytical and conceptual skills
- The ability to quickly grasp complex topics and work independently, carefully and in a structured manner
- A high level of commitment and a results-oriented approach to work
- Strong communication skills, both written and verbal, as well as facilitation and interpersonal skills; a proven ability to build and maintain networks
- A high degree of initiative, persuasiveness, team spirit and service orientation
- Strong advisory and organisational skills, good presentation skills and a professional and confident manner
- Enthusiasm for working in an international environment

Your Professional Experience

- At least two years of professional experience in a relevant field

What We Offer

- An open and friendly working atmosphere in a committed team
- Attractive benefits, including an occupational pension scheme and supplementary health insurance
- Flexible working hours, part-time options and home-office arrangements
- Regular team events
- Professional development opportunities
- Collaboration with renowned research institutions and innovative companies on key topics shaping the future
- International business travel
- 52,000€ - 72,000€/year (full-time estimate)
- Visit our [website](#) to discover more about our exciting working environment.
